## **Life Settlement Investors Get Direct Access to Experts Online: Gain Confidence with Transparency & Education**

*ISLSP monitors investments and publishes risk assessment reports. Launches industry's first Investor-oriented 24/7 online forum to complement their monthly investor awareness webinars*

**SCOTTSDALE, AZ** – I.S.L.S.P. (International Society of Life Settlement Professionals) recently approved UK Integrity Group's industry's first risk assessment methodology, and is now launching 24/7 Exchange (<http://tinyurl.com/islsp24-7>), an online discussion forum allowing investors to dialogue online with industry experts on the most important life settlement issues. Recent financial media coverage reported another fund "caught with pants around ankles", a case of mismanagement of life settlements, incorrect evaluation, and poor risk management leading to major loss of invested assets. ISLSP reacts by releasing its first monthly Investor Report, covering the preliminary risk assessment of a fund as an example of issues to be considered. More than 40 existing life settlement funds are currently being assessed for further reporting.

ISLSP's mission is to build confidence through education and investor-oriented transparent information. Investors wishing to evaluate investment proposals with proper risk assessment methodology may contact us for independent advice from our international group of professionals.

### **About ISLSP**

ISLSP was founded by an international team of pioneering Life Settlement professionals and investors seeking to codify a standard Life Settlement assessment guideline which allows objective and accurate determination of the true value and risks associated with purchasing Life Settlement investments. ISLSP attracts new capital to the industry by educating investors, maintaining best practices and facilitating networking among best of breed and professional business partners. Visit [www.islsp.org](http://www.islsp.org) for additional information.
